

This declaration refers to the following products:

Polyester Film 71 µm, 100 µm, 125 µm + 175 µm

We guarantee for above mentioned product(s) manufactured by the manufacturer the following characteristics:

The sum of the concentrations of lead, cadmium, mercury and hexavalent chromium resulting from substances present in the above mentioned film(s) does not exceed 100 mg/kg, according to the article 5 point 4 of the REGULATION (EU) 2025/40 on packaging and packaging waste (PPWR).

This information is based upon the manufacturer's knowledge of its manufacturing process and/or the statements and information provided to the manufacturer by its raw materials suppliers. This statement is believed to be correct as of the date of issue.

[The present certificate only concerns the properties of above mentioned film(s) and does not guarantee the compliance of final article made with that (these) product(s).]

Validity date : This document is valid until the next relevant legislative and/or regulatory change with a maximum of one year as of the date of issue of the statement.

Edition: 03_2026

This information was taken from the manufacturer's declaration of Heavy Metals.

This declaration refers to the following product(s) manufactured by the manufacturer:

Polyesterfilms

The manufacturer itself is not subject to registration or notification requirements under REACH for Polyester films, which are articles and do not contain any substance that would require communication down the supply chain (Art. 33), or registration or notification (Art. 7). No substance in the film(s) is intended to be released under normal or foreseeable conditions of use.

According to the Regulation 1907/2006/EC (REACH) and its amendments, the manufacturer confirms that the substances used for the manufacturing of the above mentioned films:

- Have been registered by the manufacturer or by its suppliers, or by the suppliers' REACH-Only Representative
- Are exempted from registration.

The manufacturer confirms that the above mentioned films do not contain in a concentration above 0,1 % weight by weight, any substances:

- classified as carcinogenic, mutagenic, toxic for reproduction (CMR) category 1A or 1B (Regulation 1272/2008/EC),
- included by ECHA of the Candidate List of Substances of Very High Concern (SVHC) <http://echa.europa.eu/web/guest/candidate-list-table> update 04/02/2026,
- listed in the Annex XIV of REACH "List of substances subject to autorisation"

The manufacturer will continue to monitor the identification of SVHC under REACH to provide updated certificates as needed and comply with all requirements under REACH.

Furthermore, on the basis of our current knowledge of raw materials, plastics, manufacturing process: the above mentioned film(s) is (are) not subject to the requirements of Annex XVII of REACH "Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles".

This information corresponds to the present state of our knowledge. Any user is responsible for determining the suitability of the manufacturer's products for its particular application.

This document is valid until the next relevant legislative and/or regulatory with a maximum of one year as of the date of issue of the statement.

Edition: 02_2026

This information was taken from the manufacturer's declaration of REACH.

This declaration refers to the following products:

Polyester Film(s)

In the manufacturing of the above mentioned product(s), we do not use or intentionally incorporate the following substances:

Per- and polyfluoroalkyl substances (PFAS) as defined in Article 5 PPWR regulation 2025/40:

"PFAS' means any substance that contains at least one fully fluorinated methyl (CF₃-) or methylene (-CF₂-) carbon atom (without any H/Cl/Br/I attached to it), except substances that only contain the following structural elements: CF₃-X or X-CF₂-X', where X = -OR or -NRR' and X' = methyl (-CH₃), methylene (-CH₂-), an aromatic group, a carbonyl group (C(O)-), -OR'', -SR'' or -NR''R'''; and where R/R'/R''/R''' is a hydrogen (-H), methyl (-CH₃), methylene (-CH₂-), an aromatic group or a carbonyl group (-C(O)-)."

Please note that we don't do specific analyses to detect the presence of above mentioned substances.

On the basis of our current knowledge of raw materials, chemical reactions and manufacturing process, the presence of these substances is not expected (except eventually as impurities in trace level).

[The present certificate only concerns the properties of above mentioned film(s) and does not guarantee the compliance of final article made with that (these) product(s).]

Validity date : This document is valid until the next relevant legislative and/or regulatory change with a maximum of one year as of the date of issue of the statement.

Edition: 04_2026

This information was taken from the manufacturer's declaration of PFAS-Regulation
